NIR Measurements

Using the Near Infrared (NIR) system has a great advantage. The system can rapidly analyze all sorts of materials. Basically bringing laboratory based analysis to your own production site.

NutriControl digital services

To guarantee reliable and robust results, A NIR system needs to be maintained and requires reliable calibration models. NutriControl offers a complete package of calibration lines and services to ensure your system produces reliable results.

NIR-Cloud

To ensure fast and reliable predictions worldwide, we offer a cloud based solution. By connecting your instrument to our service, results are predicted using our most up-to-date calibration lines. After connection, prediction results can be reported within 10 seconds anywhere in the world. Our digital solution also offers you access to your data anywhere and anytime.

Trusted results

Cost efficiency

Fast ROI

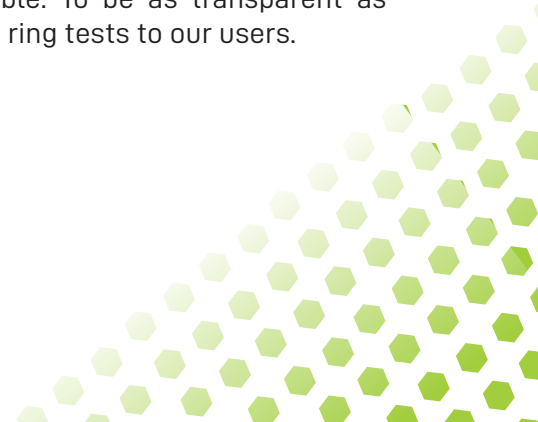

Powerful statistics

Automatic monitoring

Reliable results

By carrying out ring test samples amongst our users several times per year, we can ensure that the results extracted from the NIR-Cloud are trustworthy and reliable. To be as transparent as possible, we send the reports of these ring tests to our users.

Access to data

The NIR-Cloud gives our users access to all their results (NIR and wet chemistry), documents and reports. They can access all the information by computer, mobile phone or tablet at any time. The results can also be automatically sent to management systems, using API interface. This way the users of the NIR-Cloud have extra flexibility with integrating data.

NutriControl NIR support

Our dedicated NIR team works daily on maximizing our support for the users of the NIR-Cloud, by updating calibration lines, monitoring, servicing and reporting. Our goal is to maximizing the benefits of having a NIR system and make reliable quality control affordable, fast and easy.

If you have any questions about the NIR-Cloud or the other services NutriControl offers. Feel free to contact us and scan the code.

Access the NIR Cloud in four steps.

- 1** Contact NutriControl and ask for the NIR-Cloud possibilities.
- 2** Assign & connect a NIR instrument
- 3** Pick a calibration line.
- 4** Start with producing your own accurate analysis data.
